

Commercial version will be released on January 12, 2015

Dear TimeSens user,

We are pleased to inform you that the **first commercial version** of TimeSens (V1.0) will be officially launched on **January 12, 2015**. Therefore the free version of TimeSens will no longer be available as of this date. As a “pay per use” software, you will have to accept general terms and conditions with a click-wrap agreement.

On December 10, 2014, a **new free version (Vo.95.1210) will automatically replace the current version**. These new versions will introduce the “token system” of payment to be effective as of January 12, 2015.

One token allows downloading data given by one panelist during one session lasting less than 24 hours. If the data from this panelist were collected during more than 24 hours, then the number of tokens required will be the number of 24 hours periods from the first to the last data collected from this subject. No tokens will be debited for panelists having not attended the session or having not generated data.

Following the same principle, imported data (data acquired by another software or manually) for analysis in TimeSens will debit the user account for 1 token per 100 imported canonical data lines (1 canonical data line = 1 DTS click or 1 profile score or 1 hedonic score).

New token management windows

TimeSens Newsletter #2. Nov 12, 2014

The effective cost of a token depends on the license type. All prices do not include eventual taxes.

Licence type	250 tokens pack	500 tokens pack	750 tokens pack
Commercial - zone 1 (1)	€500	€1000	€1500
Commercial - zone 2 (2)	€250	€500	€750
Academic (3)	€125	€250	€375
Free (4)	-	-	-

(1) Countries in zone 1: Any country outside zone 2.

(2) Countries in zone 2: Any country in Africa, South America and Asia (but Bahrain, Brunei, China, India, Israel, Jordan, Kuwait, Japan, Oman, Qatar, Singapore, South Korea, Taiwan, Turkey, United Arab Emirates). Both licensee and panelists have to be located in countries from zone 2.

(3) Licensee must be a public university or school, or a 100% governmental funded research institute. The software must be used for non-commercial research not being funded by private partners.

(4) For teaching or collaborative research purposes (accorded upon application for a limited time period).

Tokens will be available to purchase online from: www.timesens.com/pricing.aspx.

In order to test the system, each account will be credited with free tokens until the release of the commercial version. Those free tokens will be cancelled as of January 12, 2015.

Enjoy designing your innovative sensory sessions and analyzing the data collected with TimeSens.

As ever, your feedbacks on this new version are most welcome!

The TimeSens team

Other new features in this version

- Multiple sorting and filtering in tables (SHIFT + Click)
- Improved design of TDS buttons (customizable background)
- Automatic PPT report (Outputs tab)
- Panelist geolocation and browser information (Monitoring tab)
- Automatic data replacement on filtered data (Data tab)
- Website update (www.timesens.com)

What has changed in this version?

- In order to improve software performances, **outputs are no longer saved in the session XML file.**
