

New features of Q1 2016

Dear TimeSens user,

On **March 18, 2016**, version (V1.1.0318) will automatically replace the current version. This new version will introduce several new features and improvements which will be detailed in a forthcoming “technical” newsletter. But the most important is that **INRA had assigned the rights of exploitation of TimeSens to a new society named TSI** (Temporal Sensory Innovation).

With this new version marketed by this new company, **a new commercial model of TimeSens has been launched**. There is now a **yearly subscription giving the right to access TimeSens and no more tokens required for data importation** and thus for the analysis of the imported data. However **the token system is still valid for data acquisition** (one token per panelist by 24 hours). The yearly subscription comes with one hour of phone support. The tokens can still be bought from the Timesens website with a minimum of 250 tokens at 2 euros each and with **progressive decreasing cost according to the size of the pack ordered**. Please note that the tokens can now be transferred to another TimeSens account from the same company. Former clients will automatically switch to the new license and their remaining tokens will be credited on their new one.

Pricing of the new system (in euros, taxes not included):

Pack	Full price (1)	Low price (2)
One-year subscription	500	250
Pack 1: 250 tokens	500	250
Pack 2: 500 tokens	900	450
Pack 3: 1 000 tokens	1 600	800
Pack 4: 2 000 tokens	2 800	1 400
Pack 5: 5 000 tokens	6 000	3 000
Pack 6: 10 000 tokens	10 000	5 000
Pack "unlimited"	20 000	10 000

TimeSens Newsletter #3. March 2016

(1) The « Full price » license is required for any commercial usage outside the countries eligible to the reduced price.

(2) The « Low price » license is for countries from the [OECD list](#) and for academics (public universities and research centers) using it for non-commercial purposes and non-contractual activities with industries.

In addition to these paying licenses, free teaching licenses can be granted for limited periods covering only teaching activities and not student internship in industries. Try-out licenses for software evaluation can be opened online to anyone for a period of one month non-renewable.

To know more: <http://www.timesens.com/pricing.aspx>

To come: an offer of on site and inter-enterprise training program

TSI also offers new services:

- Phone support (above the free one hour)
- Design and deployment of sessions dedicated to specific needs
- Data analysis
- Specific developments
- Sensory study design and run

As ever, your feedbacks on this new version are most welcome!

The TimeSens team
